recommend other colleagues to take part in the GirlsGoCircular proj because I have gained
a lot of new and interesting information through this project that I will definitely use in real
life situations.To support the circular economy I will turn off the tap when I am not using it
because,saving water helps to save energy and reduce carbon pollution. I will also recycle
food waste, try not to use plastic and I also have set a target to plant a tree with my parents
this year because trees help to combat climate change, absorb pollutant gases and improve

Dix choses à savoir sur la France

Profesor Simona Negoescu

1. Le mot «France» vient des Francs, peuple germanique dont le nom est lui-même tiré du francique «frank», qui signifie «libre».
2. La France est le pays qui a le plus grand nombre de fuseaux horaires au monde, grâce à ses territoires d'outre-mer (12 fuseaux horaires différents, contre 10 pour les États-Unis et 9 pour la Russie).
3. Les deux plus vieilles villes de France seraient Marseille et Béziers, toutes deux fondées par les Grecs au VIe siècle avant J.-C.
4. La France est le pays qui compte le plus de prix Nobel de littérature, avec 15 lauréats (suivi par les États-Unis avec 11 lauréats et le Royaume-Uni avec 10 lauréats).
5. Dans *La Marseillaise*, l'expression «sang impur» ne fait pas référence aux ennemis de la France, mais aux révolutionnaires, qui se définissaient comme «impurs» par opposition au sang pur des nobles. La strophe «Qu'un sang impur abreuve nos sillons» signifie donc que le peuple est prêt à verser son sang pour défendre la patrie.
6. Jusqu'en 2012, on ne trouvait qu'un seul panneau «STOP» dans tout Paris. Ce panneau était situé à la sortie d'une entreprise de matériaux de construction, rue Saint-Exupéry dans le XVIe arrondissement. Aujourd'hui, ce panneau a été retiré.
7. De nos jours, il règne encore plusieurs rois en France. En effet, Wallis et Futuna, territoire d'outre-mer, compte trois rois (un à Wallis et deux à Futuna). Ces monarques sont rémunérés par l'État et ils ont autorité sur leurs territoires respectifs.
8. L'armée française est la seule d'Europe à compter encore des pigeons voyageurs dans ses rangs. Entretenus au mont Valérien près de Paris, ces pigeons peuvent être utilisés pour effectuer des transmissions en cas de catastrophe majeure.
9. Rapporté au nombre d'habitants, la France est de loin le pays le plus nucléarisé au monde (58 réacteurs pour 66 millions d'habitants), suivi par le Japon (54 réacteurs pour 127 millions d'habitants) et les États-Unis (104 réacteurs pour 319 millions d'habitants).
10. La France est le premier pays à avoir instauré un système de transport en commun. Dans les années 1660, les «carrosses à cinq sols» établissaient un système de carrosses circulant à heure fixe sur des lignes qui reliaient différents quartiers de Paris. Le concept a été développé par Blaise Pascal.

Prof. Coord. Stanca Gabriela Violeta

Doar noi

Printre valurile mării
Mă uit profund îngânduratã
Dau uitare exprimării
ùL UmVXIOX XúXUDWm

Le aud spărgandse

Valurile de topaz
Totul e doar o iluzie
Caci mă mângâie pe obraz

Ca si gândurile mele
Uneori nu le stiu sursa

Marea purtând medicamentul
In reflexia sa

Briza ei, o armonie
Dansul ei, o simfonie
Iar sclipirea sa mã poartã
Pe o aripã de artã

Sclipirea sa mã poartã
Într-o lume fãrã ceartã,
Lume calmã si aleasã
Doar eu si marea albastrã.

Culea Maria, clasa a VI-a A
